The purpose and the problem

- ◆ This company is only has a shop and does not have any online shopping or service websites.
- ◆ As a solution, we have decided to build a website to continue online services that can allow safe online payment and bring updates of new textiles that are available.

Our Task

- First of all select a theme color for the website and gather the required information and photos for the website.
- After that create a menu bar on the home page by mentioning those categorized pages and linking those to their relevant web pages.
- And we want to create a cart page to preview the orders before completing a purchase and then simply checkout by paying online.
- On the Contact Us page, we want to put the correct company contact details.
- Our website responsive to all devices to make it user friendly.

Our Goals

- ◆ Our goal is to build a website that is user-friendly and can be used and accessed by anyone.
- ◆ The other main goal is to provide security where the customers can trust and proceed with their purchases online when it comes to online transfer of money.
- ◆ Finally, we expect that the customers to be satisfied with our online services and the company to be marketed as much as possible at the same time.
